EDUCATION

Western University

Sept 2023 – May 2027

B.Eng + HBA, Software Engineering and Ivey Honours Business Administration Dual

London, ON

- GPA: (3.7/4.0). Achieved Dean's Honour List, Western Scholarship of Distinction, 2nd in WEC 2024 Junior Design.

EXPERIENCE

Project Operations and Financial Analyst Intern

June 2026 – Aug 2026

3MA Consulting Inc.

Toronto, ON

- Engineered an automated web-scraping and ETL pipeline in **JavaScript (Google Apps Script)** to extract construction tenders from protected directories, implementing **ScraperAPI** and **Supabase** JWT authentication.
- Integrated the **Gemini 3.5 Flash** and **Tavily Search APIs** to build an **LLM-powered data enrichment engine**, autonomously extracting, verifying, and deduplicating complex metadata.
- Designed a programmatic HTML email digest system and **Google Sheets** logging architecture to streamline business development workflows and eliminate redundant manual prospecting.
- Executed quantitative financial workflows and expense reconciliations for a **\$5M+** legacy portfolio, while defining an ICP that helped uncover **\$10M+** in new pipeline opportunities.

Business Analyst

May 2025 – Aug 2025

Barcoded Fit Tech Inc.

Hamilton, ON

- Translated business requirements into technical **API specifications** and analyzed market trends to shape the long-term technical product roadmap.
- Collaborated cross-functionally with engineering and leadership during sprints, synthesizing pitch materials that helped secure **\$50k+ in grant funding**.

PROJECTS

Gold Dashboard (Financial Analytics Platform) | *Python, Pandas, Plotly, Ollama*

- Implemented a driver-based attribution engine using vectorized **NumPy/Pandas** and regression analysis to decompose gold returns into USD strength, real rates, and inflation drivers.
- Developed an **AI-assisted scenario analysis module** with deterministic scoring, converting qualitative macro narratives into structured directional signals.
- Optimized data ingestion, caching, and rolling-stat pipelines, reducing load times by **35%** and improving overall analytics performance by up to **6×**.

Reddit Stock Predictor (Data Analytics) | *FastAPI, PostgreSQL, React, Node.js*

- Built a scalable ingestion pipeline processing **115k+ posts and comments**, with normalized storage optimized for low-latency time-series queries.
- Designed a modular **FastAPI** backend for sentiment extraction and correlation analysis, supporting **200+ unique tickers** with **45% faster queries**.

Harmony Massage Clinic Website | *MongoDB, Express, React, Google Calendar API*

- Developed and deployed a production MERN-based clinic application supporting visibility into **1,500+ historical appointments** for **200+ clients**.
- Integrated **Google Calendar APIs** to securely sync appointment data, enabling patients to view past bookings without exposing core scheduling controls.
- Built a responsive **React** frontend with component-driven architecture, implementing secure data fetching and role-aware views for user and admin workflows.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, C/C++, Bash, HTML/CSS

Web & APIs: React, Next.js, Node.js, Express, FastAPI, REST APIs, Google Apps Script

Data, AI & Backend: Pandas, NumPy, PostgreSQL, MongoDB, Supabase, Streamlit, Plotly, Ollama, Gemini API

Tools & Platforms: Git, Docker, AWS (EC2, S3), CI/CD, Firebase, ScraperAPI, Agile/Scrum
